Where personal growth takes root

TOOLS FOR GROWTH

Maple is a collection of tools created to help you capture, curate, and internalize your work.

What kind of tools? You'll find options for Journaling, individual Self-study, Reflection, recording Sleep and Stress, sharing with trusted Thought Partners, and working with Personal Growth experts, like your coach.

SAFE AND SECURE

When it comes to personal growth, privacy and security is a must. Maple was built with that in mind.

You are always anonymous in Maple, you're never asked for your email or any other identifying information in the app. All of your entries are backed up and kept safe from prying eyes.

YOUR WORKSPACE, YOUR WAY

Go ahead, customize your Maple experience.

Create a dashboard with the information you want to see. Organize your entries with your own Categories and Tags. Set reminders for the stuff you want to come back to. Use Maple however it makes sense for you and your goals.

APPS AND OPTIONS

Personal growth can happen any time and any where, and Maple embraces that.

Work from MapleThat.com in any web browser, or get the free Maple app from Google Play or the Microsoft Store. Maple comes with plenty of free options, and there's always more to upgrade to in the built-in Maple Store if you need more.

MAPLE WITH YOUR PRO

Maple Pro lets you collaborate with your personal growth professional in your Maple workspace.

Keep your momentum going between sessions by sharing ideas, insights and feedback with your Pro. Get your Next Steps directly on your Maple dashboard and reminders to keep working on your growth plan.
